Description

Section 6:

I found Section 6.2 up until Section 6.2.3 difficult to follow and parse. I have a vague idea what an S3 Store is, but I'm not sure most of the intended audience of this paper will. I particularly struggled to understand the description of the Butler system and its datatypes and valid values for the key dimensions in DP1. Much of this section seems useful for a someone deep diving into the RSP/USDF system rather than a data release paper. I also think the level of detail interrupts the flow of the paper. I strongly recommend that Section 6.2 be rewritten to highlight the services such as the Butler and APIs available for DP1 for the level of what a user of DP1 would want to know about the services with the detail description and relevant tables placed into an Appendix. I also encourage the authors to consider writing a separate dedicated Rubin Science Platform software paper as well.

Section 6.5.1- Although understandable this is at a level of detail that I think is beyond I think most of this text the intended reader will need interrupting the flow of the paper. I would place this information into an appendix for the interested reader referenced in the main text.

Section 6.5.2 - Is the Consolidated database available? Logging into the Rubin Science Platform portal I did not find a reference to the Consolidated database among the catalogs or any links returned when searching "consolidated database" in the DP1 online documentation. I did find the ivoa.ObsCore table but that is related to the TAP service If the Consolidated database is not available now several months after DP1 was released, then it is not part of DP1 release and the description of this should be removed from the paper.

Comments

Comment by Leanne Guy [24/Oct/25]

Additional “minor comments” to address:

- Line 2535 - A one paragraph sentence. Perhaps this can be added to other paragraphs in the section.

Comment by Leanne Guy [26/Jan/26]

Section 6.5.2 – The ConsDB is still not available to the DR community so I will drop this section and re=include it with DP2.

Comment by Leanne Guy [26/Jan/26]

6.5.1 – This Qserv section is only a 1/4 of a page and I have had comments from others that this is interesting information. I am choosing to leave it in

Comment by Leanne Guy [26/Jan/26]

6.2 up until Section 6.2.3: I understand the comment and that this content is not easy for everyone, however I’ve also had the opposite comments from other readers that this information is necessary to understand the data services and how to access data. Noting also that this is a ***Data Preview*** – I’s rather leave it and see how the broader community respond

Comment by Leanne Guy [26/Jan/26]

An RSP paper will be coming in future

Comment by Leanne Guy [26/Jan/26]

Done

Comment by Leanne Guy [26/Jan/26]
