Description

Section 7:

Section 7.4 reads as talking about support for future data releases/previews. It seems to know what the Rubin users community needs in terms of engagement until there's feedback about the engagement activities that are part DP1. I imagine the Rubin Community Workshop in 2026 could focus more on prompt data products and alerts rather than DP1. I recommend restructuring this section to focus on the activites associated with DP1.

Section 7.5 and 7.6 - I appreciate the desire to describe the Observatory's model for community support, but it is not clear whether all of these mechanisms were in place for DP1 or how they were implemented in DP1. Was the users committee and 8 science collaborations given advanced access to provide feedback before DP1 was released? I don't see many members of science collaboration leaderships or users committee on the

author list, so how did the science collaborations and users committee contribute to DP1? If they are providing feedback after DP1's release, then I don't think this text is within the scope of the paper as it's really describing efforts of supporting future data releases/observations operations model. I think Sections 7.5 and 7.6 are important descriptions for an overview paper of Rubin Observatory/the LSST that I encourage the Observatory and authors of this paper to write.

Comments

Comment by Leanne Guy [24/Oct/25]

Additional “minor comments” relevant to this section to address:

- Section 7.2 - It would be useful to include a footnote link directly to the tutorial notebooks documentation. There appears to be a DOI (https://doi.org/10.11578/rubin/dc.20250909.20)for the tutorials that is not cited in this section.
- Line 2856 - provide the direct link to the For Scientists direchttps://rubinobservatory.org/for-scientists given a significant portion of the readers of the paper will be accessing it through a computer or tablet device.
- Line 2918 - If this sentence stays in about the For Scientists page to access the schedule for these events, please put in an actual link to https://rubinobservatory.org/for-scientists/events-deadlines given a significant portion of the readers of the paper will be accessing it through a computer or tablet device.

Comment by Melissa Graham [07/Nov/25]

Made the edits and opened the PR.
